OBAN's Stepless Putter shafts are precision manufactured with the same relentless pursuit of perfection that has characterized the heritage of the OBAN brand for over a decade.

Made in Japan, **OBAN's Stepless Putter shafts** are engineered to leverage the purity of Japanese steel. Cold extrusion creates a seamless design crafted to deliver an unprecedented sensory experience.

The NSTP Series shafts are ideally suited for players obsessed with the accuracy, acoustics and feel afforded by pairing an exotic putter head with a seamless, stepless shaft. Shafts are available in both classic silver and smoke chromium finishes.

The shafts are adorned with brilliant holographic labels, dimensionally designed for optimal adhesion and durability.
