

OBAN's Commitment to Our Custom Fitters

OBAN partners with a select group of Custom Fitters and leading Club Manufacturers with the expertise and technology to enhance a player's performance. Our limited network of Authorized Dealers have invested in Fitting Studios staffed with veteran Fitters and Builders, and feature advanced Launch Monitor technology.

To protect the integrity of the OBAN brand, and maintain the exclusivity and margins of our shaft portfolio, our Dealers agree to the following terms:

- OBAN shafts must be sold as part of an assembled club
- Shafts cannot be resold or redistributed
- Shafts can be sold online, provided they are listed on an Authorized OBAN Dealer website that augments the Dealer's Custom Fitting business model
- In compliance with OBAN's No Discount policy, shafts cannot be advertised or sold for less than the current Minimum Resell Price (MSRP)
- Shafts cannot be advertised or sold on online shopping sites (such as Amazon or Walmart) or internet auction sites (such as eBay).

Authorized OBAN Dealers are listed on the ObanShafts.com website. All shafts sold through our Dealer Network are covered by our Standard Warranty.

OBAN One Year Limited Warranty

OBAN warrants, to the original consumer only for one year from the original retail purchase date, that its golf shafts will be free from defects in materials or workmanship, provided the shaft has not been altered, misused or abused, or damaged through neglect. Should a shaft defect occur, OBAN will replace the defective product through the authorized OBAN Dealer it was purchased from, with the same or similar product, upon return with verified proof of purchase. The warranty is automatically voided if any pull-out and / or reinstallation of the product has occurred or any other tampering from the product's original state.

OBAN's warranty policy is to work through the shaft installer, either the Equipment Manufacturer or authorized OBAN Dealer who originally assembled the Club, to initiate the warranty process and determine if the shaft qualifies for replacement.
