AirBurst AK's Medium-Firm Profile is ideal for players seeking a **Mid-High Launch & Low-Mid Spin**.

The powerfully explosive, tour-designed AirBurst AK (Kevlar Cloth) shafts represent a complex synthesis of Olympic's superior Japanese engineering, ultra-thin ply fabrication techniques and exotic Torayca™ carbon fiber.

OBAN

OBAN's AirBurst brand is synonymous with innovative designs made possible by an unfettered fusion of exotic Japanese carbon fiber and structural superiority. Unified by a commitment to create the world's best in class products, Olympic Co LTD and OBAN share the distinct ability to deliver high performance shafts with an optimal balance of strength and elasticity.

Materially transcendent, TORAYCA® is the leading global brand of ultra-thin ply carbon fiber supplied by Toray Industries, Inc. AirBurst products are crafted using TORAYCA® high modulus exotic material.
